SEMIAUTOMATIC
GAS KIT 2 gr

Etnica semiautomatic 2 groups is also available with GAS Kit.

It is really useful in Countries or places with high costs of electricity or with power supply instability. The advantage is also that you can easily connect the machine to a battery by an inverter because the electricity is only for the pump, for the group's solenoid valves and for the control board. When the pressure in the boiler reaches the parameter you setted the flame of the gas kit keeps it stable in order to guarantee the same constant brewing as in Etnica semiautomatic 2 groups without gas kit.
